

## Spring 2010 Newsletter

### News

**Thinking of buying a new PC** - then take a look at my free buyers guide and regularly updated list of recommended desktops and laptops on my website, also feel free to email me with any questions you have prior to purchase

---

**Internet Browser Ballot** - as you may already be aware Microsoft lost a legal case in the European court last year concerning the inclusion of Internet Explorer as the default browser in Windows - because of this an update will be released to all users in the next few days which will display a ballot screen asking you to choose which internet browser you wish to use and you will be able to choose from Internet Explorer, Google Chrome, Firefox and several other options

I would recommend that you choose **Internet Explorer 8** when presented with this choice, as this is the most secure and supported browser and will give you the most protection when browsing the internet especially when used in conjunction with a reliable firewall/virus package such as AVG Internet Security

---

It is amazing how many customers I visit who do not backup important files, photos etc - I know it can be a pain finding the time to do it - which is why I use and recommend **Carbonite Online Backup** - it is very simple to install and will automatically back up all new files, photos etc in the background without you having to do anything! - providing added peace of mind in case of virus infection or hard disk failure causing you to lose all your important documents and precious photos

For more information please click the link to Carbonite on the [Links](#) page of my website, and if you are interested in signing up please let me know and I will send you a voucher so in addition to the 30 day free trial you also get another month absolutely free!

---

PC Assist will be **closed** between the 22 - 31 May 2010 for annual holidays, I will still be checking emails during this period so please email me if you have an urgent problem and I will get back to you as soon as possible

### Special Offers

**Spring Clean your PC** - The PC Health Check involves a complete examination of your computer both inside and out - checking for and removing any viruses/spyware, making sure your computer is up-to-date and secure and fully testing all the hardware to make sure everything is running well

This service normally costs £30, but for a limited time only I can provide this service for only £25 or with an inclusive 12 month subscription to AVG Internet Security for £45

Please visit my website for more details of the PC Health Check service and make sure you mention this offer when booking
